

ALL ABOUT MOBILE HEALTH TECHNOLOGY (MHT)

CHAMPIONS looked for cost-effective real world evidence from LMICs to reach children under 5 in temporary accommodation in the **UK**

MHT used to increase coverage and utilisation of child health services in refugee populations

HERA app mobile created in 2018 to improve access to healthcare among **Syrian** refugees due to high smart phone usage

Application provided:

- Healthcare appointment reminders
- Enabled access to health communication
- Stored medical records
- Contact emergency services and navigated the healthcare system in 3 most spoken languages

200 women either pregnant or had a child under 2 revealed that automated reminders **improved** compliance with **child immunisation**

↑ Child immunisation through automated reminders ↑

Regular appointment reminders for Palestinian refugees in **Jordon, Syria, Lebanon, the West Bank** and **Gaza** for **Palestinian** led to:

↑ increased detection of stunting, wasting overweight and obesity among under 5's ↑
